Objective

Motivated B.Tech Information Technology graduate with hands-on exposure to Python, SQL, Git, and Data Engineering fundamentals. Seeking an entry-level opportunity in IT, Software, or Data-related roles where I can apply my skills, learn continuously, and contribute to organizational growth.

Experience

- Regex Software Services** July 2025 - Present
 - Data Engineering Intern
 - Data Engineering Intern at Regex Software
 - Learning Python programming for data handling and automation tasks
 - Getting familiar with SQL basics and database concepts
 - Understanding fundamentals of Data Engineering and industry workflows
 - Practicing Git and GitHub for version control and code management
- Learn and build by TechieNest** -
 - Python programming Internship
 - Practiced Python basics including variables, loops, functions, and strings
 - Solved beginner-level programming problems
 - Improved logical thinking and coding confidence

Education

- Arya College of Engineering, Jaipur** 2022 - 2026
 - B.Tech in Information Technology
 - 7.2

Skills

- Python
- SQL
- Excel
- Linux Basics
- Git & GitHub
- DBMS
- OOP Concepts

Projects

- Student Management System**
 - Developed a Python-based Student Management System to manage student records using CSV file storage.
 - Implemented CRUD operations including Add, View, Search, Update, and Delete functionalities.
 - Used Python modules such as csv and os for file handling and data management.
 - Improved understanding of functions, conditional logic, loops, and structured programming concepts.

Achievements & Awards

- Ethical Hacking Essential - EC-Council
- C Training Certificate
- Cybersecurity Analyst Job Simulation -Forage
- Introduction to Cyber Security - Cisco Networking Academy
- Python Programming Certificate - Learn and Build
